

What a wonderful reference letter from a satisfied client! Recently, we were contracted through Henry F. Teichmann Inc. to install a stainless steel clean room for the Jushi USA plant in Columbia, SC. With the project now complete, this is the letter we received from Teichmann:

---

I want to commend you for your quality work on installing the stainless-steel clean room for Henry F. Teichmann in Jushi USA plant, SC.

The subject clean room located in the Fiberglass Forming area is custom designed by the owner with limited technical and installation details, not to mention in Chinese. Nevertheless, with your leadership and close supervision, you and your team managed to overcome these shortcomings and work efficiently with owner field representatives despite any language barrier. A note to mention is the field engineers involved, Messrs. Zhou, Qian and Tang often complimented you of your dedication, thoroughness and problem-solving skills during various phases of the installation.

As the installation has been successfully signed off and accepted by Jushi management on May 1, I look forward to working with you on future projects. Moreover, I wish this email will serve as testimony and recommendation for your future clients.

Once again thank you for your outstanding service.

Yours Sincerely,

Wah Chiung

HFT Project Team Leader
